PRECIOSA

# LIBA Chunks / LIBA Cullet

*We present an exceptional material that is suitable for glass blowing, pressing, fusing and other glass processing techniques.*

The consistent properties of LIBA 2000+ in the form of cut fragments will be appreciated by both glass studios and, for example, schools that use it as a basic raw glass material for further processing. The physical and chemical parameters are compatible with the range of colored rods LIBA Colors 96. Combining these materials will give rise to an enormous range of color variants that you can use in your artistic work.
