PRECIOSA

Innovated PRECIOSA Tubes

We present the attractive PRECIOSA Tube Seed Beads in extended lengths.

These Czech seed beads from the traditional PRECIOSA Traditional Czech Beads™ range look like cylinders with a round hole.

In addition to the standard sizes of these cut seed beads, we also offer another three larger sizes, namely 40 x 3 mm, 50 x 3 mm and 60 x 3 mm. The innovated PRECIOSA Tubes are larger seed beads with a thicker wall and a bigger hole. As such, they are stronger and excellently suited for making costume jewelry. You will appreciate the new properties when linking seed beads on an eye pin or during multiple stringings. The surface of the PRECIOSA Tubes with a black glass and crystal base can be decorated with 10 vacuum half-coatings. The current color range for the glass tubes contains the complete selection which is feasible during the production of these long variants. You will find a pallet of blue to green shades with the option of silver linings, as well as crystal and black.
