# PRECIOSA *Two-Cut Beads*

*Czech seed beads in the shape of a short roller are called PRECIOSA Two-Cut Beads.*

*They are produced using a similar technology to other PRECIOSA Seed Beads, i.e. the cutting of glass rods with a round hole and a hexagonal surface.*

*After cutting, the PRECIOSA Two-Cut Beads are fine tumbled and heat polished in order to rid them of any sharp edges.*

*PRECIOSA Two-Cut Beads are produced in five basic sizes from 1.6 mm to 2.7 mm (in a zero series from 12/0 to 8/0) in transparent and opaque glass and with different finishing variants.*
