- a 50 mm eye pin; a base, for example a 16 mm metal sieve for clip-on earrings

- a 0.20 mm nylon line; a thin needle; scissors;
a lace ribbon, about 1 cm wide (about 25 cm for one angel)

Difficulty: 

Procedure:

The little angel consists of three circles consisting of various numbers of Tee. These are reinforced pressed beads. The head is made with the larger ball, under which you should tie a bow.

Step 1:
String 6x Tee. Thread the needle and line through them one more time. Adjust their slant after stringing them. The wider section (the shoulder) should be at the outer edges, alternately slanted to the left and the right. The narrower section (the feet) should be in the middle. Carefully tighten them so that the Tee do not twist over. Tie them off with three knots. Pull the end of the line into the surrounding Tee.

Step 2:
String 12x Tee. Thread the needle and line through them one more time. Adjust their slant after stringing them. Carefully tighten them. Tie them off with three knots. Pull the ends of the line into the surrounding Tee. Place the PB2 in the centre.

Step 3:
String 16x Tee. Thread the needle and line through them one more time. Adjust their slant after stringing them. Carefully tighten them. Tie them off with three knots. Pull the ends of the line into the surrounding Tee. Place the PB3 in the centre.

Step 4:
String the eye pin through the central hole in the metal sieve's dimple, followed by the PB3 from the largest circle, the PB2 from the medium-sized circle and then the smallest circle. Add 1x R and the PB1. Shorten the protruding wire to about 12 mm. Grasp the end between the round points of the pliers. Twist the wire around the point twice.

Step 5:
Tie a bow in the lace ribbon above the R under the largest ball (the head). You can hang the angel from your Christmas tree using a cord strung through the eye that you twisted at the top.
