SEED BEAD SET MADE USING PRECIOSA TERRA INTENSIVE

Fern

PRECIOSA

Fern

We have extended the range of distinctive PRECIOSA Terra Intensive seed beads to include the PRECIOSA Terra Intensive Matt variant. You can choose from 11 bright color shades on seed beads in matt or gloss variants. You can also combine the seed beads with 13 of our most popular types of pressed beads in the same distinctive colors. Choose your favourite color and make some brightly colored earrings or a necklace according to our DIY tutorial.

Materials and tools:

PRECIOSA Rocailles
331 39 001; 10/0;
16A86 yellow;
the necklace - 22x;
the earrings - 10x (R10)

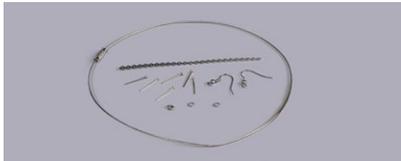

331 39 001; 8/0;
16A86 yellow;
the necklace - 330x;
the earrings - 90x (R8)

PRECIOSA Pressed Beads (PB)
111 19 001; 6 mm;
83130 yellow;
the necklace - 1x;
the earrings - 2x

- the necklace - a guide (24 eyes);
a hoop made from ordinary wire with
a screw fastening; a 14 mm eye pin;
the earrings - a guide (12 eyes); 4 mm rings;
earring hooks

- a 0.20 mm or 0.30 mm nylon line; a thin
needle; flat-nosed pliers; needle-nosed
pliers; snipping pliers; a ruler

Difficulty: ●●●●●

Technique: stringing, simple sewing

Procedure:

The necklace

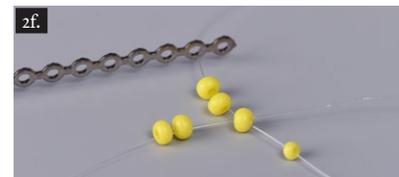

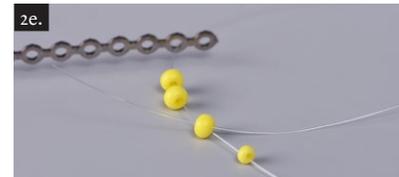

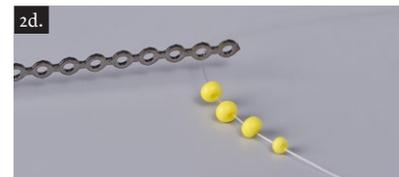

Step 1:

Prepare a guide with 24 eyes.
Straighten the guide and snip the metal
strip close to the eye (fig. no. 1a + 1b).

Step 2:

Cut off about 170 cm of the line (fig. no. 2a).
String the second eye on the guide (fig. no. 2b).
Place the guide about halfway down
the line (fig. no. 2c). As such, the line will
have a left-hand and right-hand side.
String 3x R8 and 1x R10 onto one side
(fig. no. 2d). Thread the line through the
last R8 (fig. no. 2e). String 2x R8 (fig. no. 2f).
Thread the line through
the next eye in the guide (the third).
Thread the line through the next eye in
the guide (the fourth) (fig. no. 2g).
Tighten (fig. no. 2h).

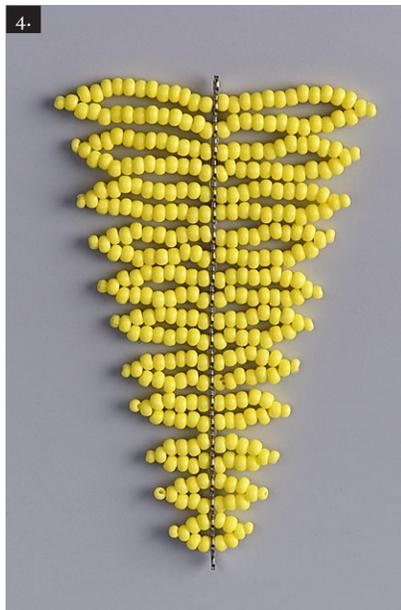

Step 3:

Continue stringing further projections,
always with 1x R10 at the point.
The number of R8 will always increase
by 1x R8. Add 1x R8 less on the other side
of each projection after threading
the line through the R8 at the point.
The R8 stringing in the projections - 4x, 5x,
6x, 7x, 8x, 9x, 10x, 11x, 12x and 13x
(fig. no. 3a + 3b).

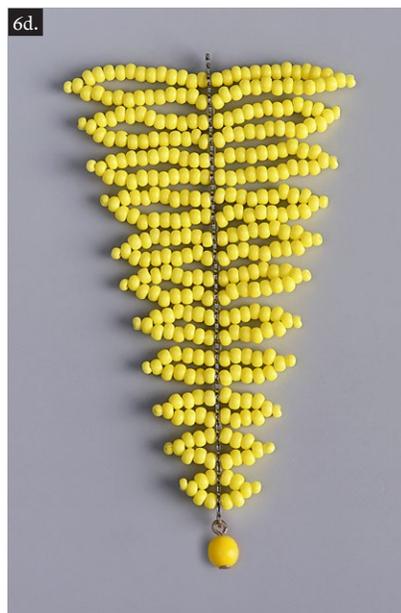

Step 4:
String the same, i.e. 11 projections,
on the other side of the line (fig. no. 4).

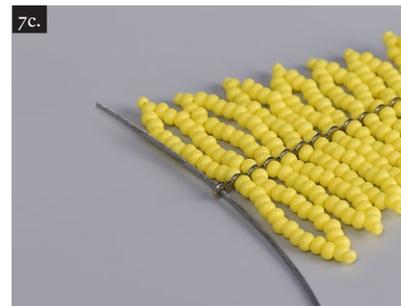

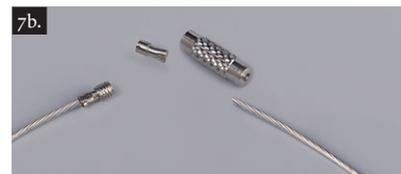

Step 5:
If the longer projections are soft, you can
thread the line through them one more
time. The length of the line should enable
this. The lines will swap sides (from the left
to the right and vice versa).
At the end, tie off the line with three knots.
Pull the ends into an R8 and cut them
off (fig. no. 5).

Step 6:
String a PB onto an eye pin (fig. no. 6a +
6b). You will need 8 – 10 mm of protruding
wire. Grip the end of the wire with
the needle-nosed pliers. Twist it around
the point of the pliers.
Hang it on the guide's bottom eye before
fully closing the eye you have twisted
on the eye pin (fig. no. 6c + 6d).

Step 7:
Remove one part of the fastening from
the wire hoop. Crimp the other part onto
the wire from the side using the flat-nosed
pliers (fig. no. 7a + 7b). Thread the wire
through the top outer eye on the guide
(fig. no. 7c). You can adjust the length
of the wire. Slide the fastening back onto
the wire and crimp it (fig. no. 7d).

The earrings

Step 8:
Prepare two guides with 12 eyes each.
Sew 10 projections (5 and 5 on each side).
Proceed in the same way as with the
necklace (the R8 stringing – 3x, 4x, 5x, 6x,
7x) (fig. no. 8a). Put a PB onto an eye pin
(fig. no. 8b). Attach the earring hook
to the other end of the guide using a ring
(fig. no. 8c).
