Difficulty: ●●●●●

Technique: sewing

Procedure:

Step 1:
String 1x EP and 1x R8. Move them to the centre of the line. Thread one part of the line through the EP and R8 one more time. Thread the second part of the line through the R8 only and from the opposite side. Tighten.

Step 2:
String 1x EP, 4x R8 and 1x EP onto one part of the line. Thread the same part of the line through the R8 from Step 1. Thread the line through the strung EP and 3x R8. String the second part of the line through from the opposite side of the strung EP and 3x R8. Tighten.

Step 3:
Thread one part of the line through 1x R8. Thread the same part of the line through the top R8 from Step 2 and once more through the strung R8. Thread the second part of the line through the strung R8 from the opposite side. Tighten.

Step 4:
Proceed in the same way as in Step 2. Thread the line through the R8 from Step 3. Proceed in the same way as in Step 3. Thread the line through the top R8.

Step 5:
String 1x EP, 1x R8, 1x R10, the open eye of the butterfly clasp, 1x R10, 1x R8 and 1x EP onto one part of the line. Thread the line through the R8 from Step 5. Also thread the same part of the line through the EP, R8 and R10 one more time, as well as the eye of the butterfly clasp. Thread the second part of the line through the EP, R8 and R10 from the opposite side. Tie off both ends of the line.

Step 6:
Thread one part of the line through the eye of the butterfly clasp, the R10, R8 and EP. Thread the second part of the line through the R10, R8 and EP on the opposite side of the butterfly clasp. String 4x R10 onto both parts of the line. Thread the line through the EP again. This will create arches above the hole.

Step 7:
Thread both parts of the line through the R8 between the EP opposite one another. String 5x R10 onto one part of the line. Head across and „one level down“ to the opposite EP. Thread the line through its hole. String 2x R10 onto the other part of the line. Thread the line through the central R10 of the already strung arch. String 2x R10. Thread the line through the hole of the opposite EP.

Step 8:
Create arches out of 4x R10 above the EP as in Step 7. Create a „cross“ out of the amalgamated arches of 5x R10 as in Step 7.
