

Tip: You can also choose different color combinations. You should constantly repeat the order of the colors in this case.

BRACELET OR A SCRUNCHIE MADE FROM PRECIOSA PERMALUX SEED BEADS

2 in 1 bracelet

PRECIOSA

2 in 1 bracelet

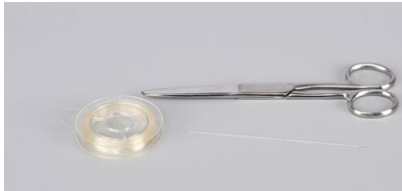

*This 2 in 1 bracelet that can also be used as a scrunchie will always come in handy!
Use this simple tutorial to create just such a scrunchie or bracelet. All you need to do is choose
the beads or seed beads that you like. We have chosen the vivid seed beads from
the PRECIOSA PermaLux collection.*

Materials and tools:

PRECIOSA Rocailles
331 19 001; 6/0; 22020 azure

- a thin needle; Opelon beading cord;
scissors

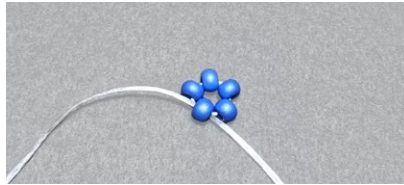

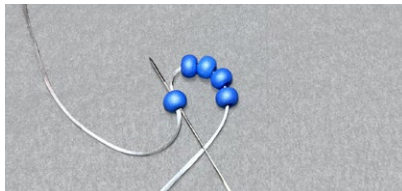

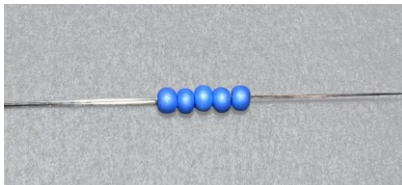

Difficulty: ●●●●●

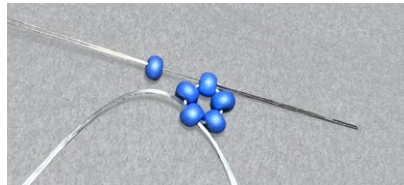

Technique: peyote spiral stitch

Procedure:

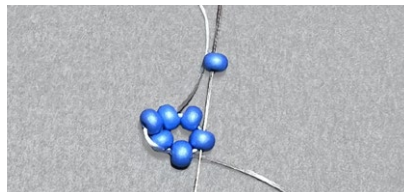

Step 1
Thread 1,5 - 2 m of Opelon onto the needle.
String 5 seed beads. Leave 15 cm of Opelon
free at the end and thread it back through
the 1st seed bead again. This will create
a little flower. You have now completed
1 row of seed beads.

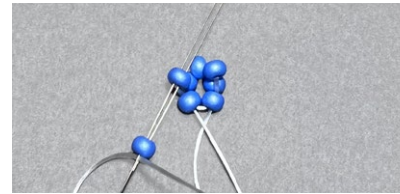

Step 2
Hold the end of the Opelon tightly and start
stringing the 2nd row of seed beads.
String 1 seed bead and thread the line
through the 3rd seed bead from the 1st row
(always thread the line through every
second seed bead).

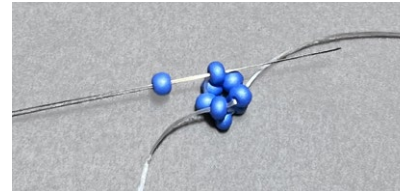

String the next seed bead and thread
the Opelon through the 5th seed bead from
the 1st row.

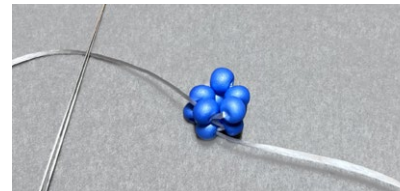

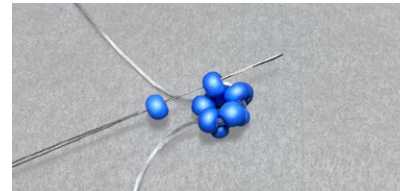

Tighten. The seed beads from the 2nd row
will sit on top of the seed beads from the 1st
row. String another 1 seed bead and thread
the line through the 1st seed bead from
the 2nd row.
Continue stringing in this way and
threading the line through every other seed
bead so that the odd number leads to
the creation of a further type of spiral stitch.

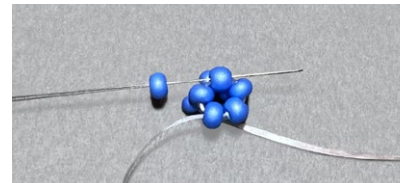

Add another seed bead and thread the line
through the next seed bead but one.

String another seed bead and thread
the line through the next seed bead but one.
You have finished the 2nd row of seed beads
- the second little flower.

Step 3
Continue stringing, so that you create
another flower consisting of 5 seed beads.
Always add 1 seed bead and thread the line
through the next seed bead but one
as in the first two rows. Keep adding seed
beads until you reach the required length
of the bracelet.

Step 4
Once you have reached the required length,
it is necessary to join the first and last rows
of seed beads. You will no longer need to
add any seed beads. Find the seed bead
that the end of the Opelon is coming from
and thread the needle through the seed
bead located directly next to the seed bead
with the end of the Opelon.

Step 5
Then thread the line trough the next seed
bead but one on the other end
of the bracelet.

Step 6
Once again, thread the line through
the next seed bead but one on the opposite
side of the bracelet. Do the same again
on the other side of the bracelet.
Now, all that is left is to tighten both ends
and tie them off with two knots.
