COMBINING PRECIOSA CANDY OVAL AND PRECIOSA PERMALUX

Menthol

PRECIOSA

Menthol

Delicate, playful, yet still elegant: these are the Menthol earrings that you can easily make for yourself. They combine the freshness of PRECIOSA PermaLux seed beads and modern color shades inspired by the trends for autumn/winter 2025. The combination of rich, deep tones and delicate accents gives these pieces of jewelry a unique character.

Materials and tools:

PRECIOSA Candy Oval (C)
111 01 388; 4 x 6 mm;
23980/15726 metallic coffee;
4x per pair;

PRECIOSA Candy Oval (C)
111 01 388; 4 x 6 mm;
02010/65431 marble khaki;
8x per pair

PRECIOSA Candy Oval (C)
111 01 388; 4 x 6 mm;
63130 menthol;
18x per pair

PRECIOSA Rocailles (R8)
331 19 001; 8/0;
22m16 menthol matt;
50x per pair;

PRECIOSA Rocailles (RT) (R10)
331 19 001; 10/0;
22m18 green matt;
230x per pair (5 g for easier stringing)

PRECIOSA Rocailles (RG) (R10)
331 19 001; 10/0;
22m17 emerald green matt;
140x per pair (5 g for easier stringing)

PRECIOSA Rocailles (RP) (R10)
331 19 001; 10/0;
22m10 pink matt;
100x per pair (5 g for easier stringing)

PRECIOSA Rocailles (RO) (R10)
331 19 001; 10/0;
22m04 coral matt;
140 ks per pair (5 g for easier stringing)

PRECIOSA Rocailles (RC) (R10)
331 19 001; 10/0;
49095 metallic coffee;
100x per pair (5 g for easier stringing)

- eye pins: 50 mm – 10x, 40 mm – 10x,
30 mm – 4x, 22 mm – 4x: longer eye pins are
best, as they can be shortened;
4mm rings – 6x; earring hooks

- a thin needle; scissors; thin S-lon or Nymo
nylon thread; pliers with rounded,
pointy ends; snapping pliers; flat-nosed
pliers

Difficulty: ● ● ● ● ●

Technique: eye pin linking, sewing,
stringing

Procedure:

The earring frame

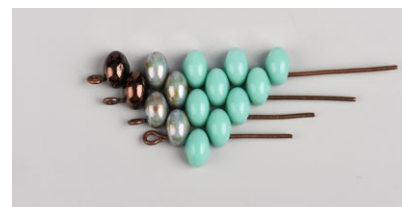

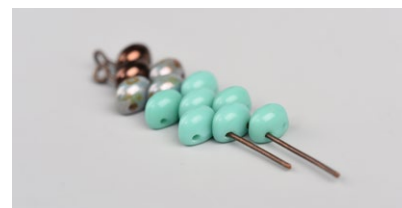

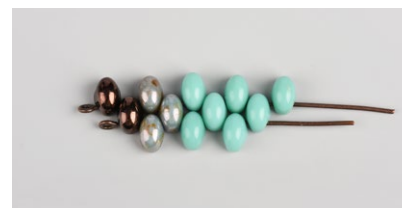

It consists of five rows of C, which interlock
(zig-zag).
The 1st row = 5x,
the 2nd row = 4x,
the 3rd row = 3x,
the 4th row = 2x and
the 5th row = 1x.
Keep an eye on the front and back of the C
when working.

Step 1

String 1x C in the upper hole and another
1x C in the lower hole onto a 40 mm eye
pin. Alternate the stringing of the holes on
the C until you have strung 5x in the 1st row
and 4x in the 2nd row. Add the other C in
the next rows placed on a mat.

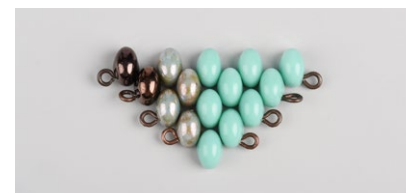

Pass the pin through the outer hole
of the C at the beginning of the row.

Insert a C into the gap and thread the eye
pin all the way to the next empty hole in
a C from the previous row. Continue in this
way until you have completed all the rows.
You can gradually use shorter eye pins,
but keep in mind the need to create an eye
at the end.

Step 2

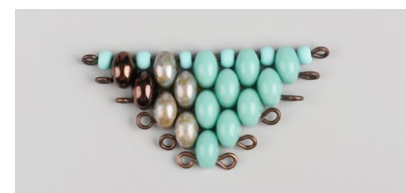

Start creating the second eye on the eye
pins. Twist them in the same direction
as the initial eye. The protruding piece
of wire should be 7 – 8 mm long.
This length will enable you to twist an eye
that is the same size as the initial one.
Grasp the end of the wire between the ends
of the pliers. Twist the wire around
the point. Gently tug on the pliers around
the edge of the hole of the C so that the eye
is centrally aligned above the hole.
Do the same on all four rows.

Step 3

Complete the outer lower row at the empty
hole in the C from the 1st row. Use a 50 mm
eye pin. String 1x R8 onto the eye pin, pass
it through the empty holes and add 1x R8
between them. String 1x R8 after the last C.

Also add an eye pin into the empty hole
of the C in the 5th row.

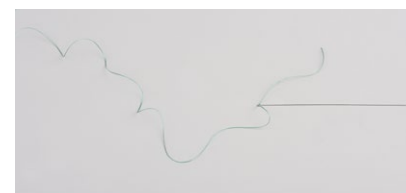

The tassels

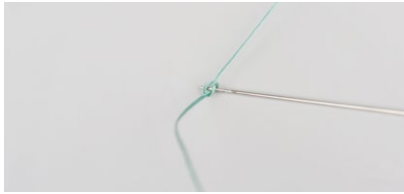

String fifteen tassels.

The longest is the central one, while
the seven tassels in several R10 colours
on either side of it gradually get shorter.
The outer tassel 6.25 cm (RG);
6.5 cm (RG); 6.75 (RG); 7 cm (RP);
7.25 cm (RP); 7.5 cm (RO); 7.75 cm (RO);
the central tassel 8 cm (RO); 7.75 cm (RC);
7.5 cm (RC); 7.25 cm (RT); 7 cm (RT);
6.75 cm (RT); 6.5 cm (RT); 6.25 cm (RT).

Step 4

Prepare 3 m of thread. thread it through
the eye of the needle and secure it with
a simple knot. Tighten it occasionally.
The thread is slippery and it will remain
strung for a long time when prepared
in this way.

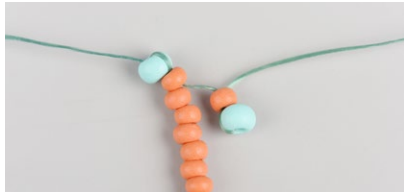

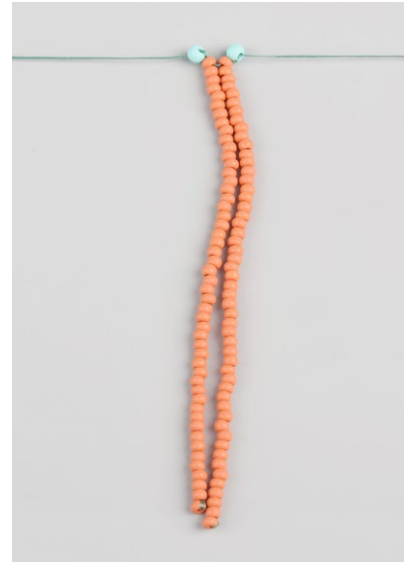

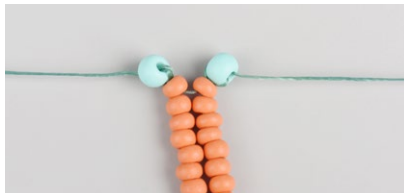

Step 5
String 1x **R8** and 8 cm of **RO**.
Move the stringing to the centre of the line.
Leave out the last strung **RO**.
Thread the line back through all the other **RO**. Thread the line through the **R8** from the opposite side.

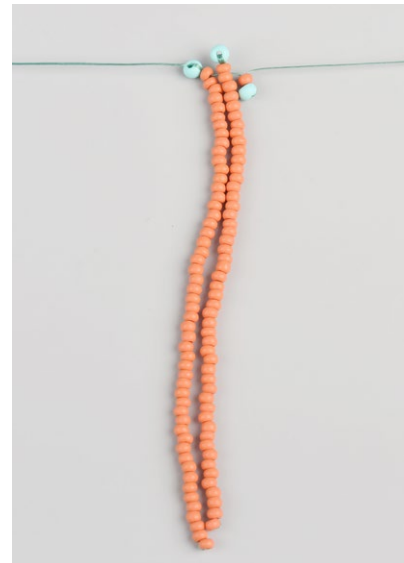

Step 6
Pass the line through the strung **RO** under the **R8** one more time. String 1x **RO** and 1x **R8**. Thread the line through the **RO** from above.

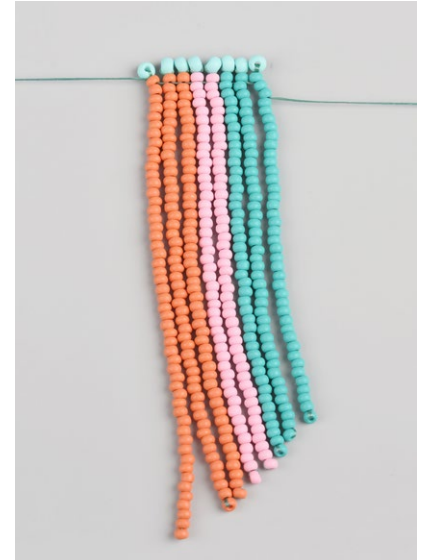

Step 7
String 7.75 cm of **RO**. Include the **RO** under the **R8** from the 6th row. Leave out the last **RO** and pass the thread back through the others. Pass the line through the **R8** from the opposite side.

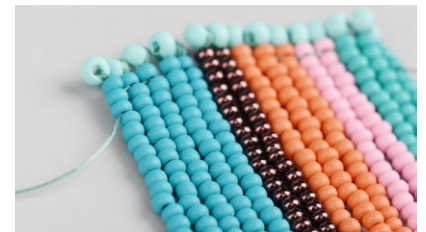

Step 8
Like Step 6.

Step 9
Repeat Steps 6 and 7. Choose the color and length of the **R10** stringing based on the order of the tassel that you are currently working on. When you get to the outer tassel, pass the line under the **R8** and 3x **R10**.

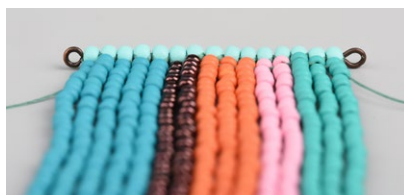

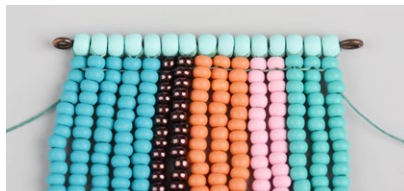

Step 10
Create the second half of the tassels.

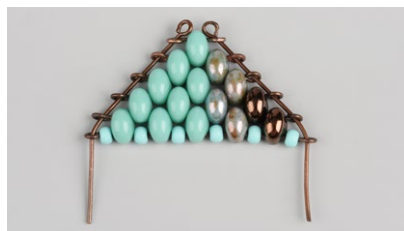

Step 11
Thread a 50 mm eye pin through the **R8**.
Twist the second eye. It should be twisted
in the same way as the initial one.

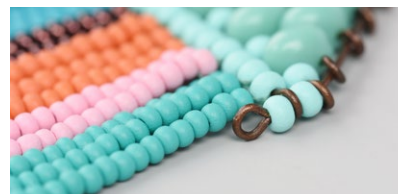

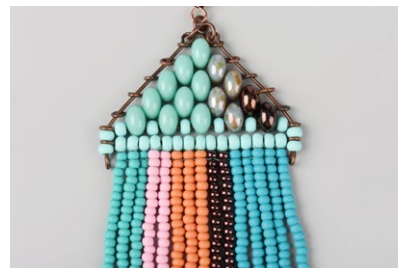

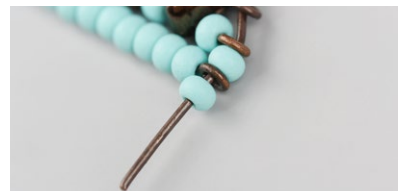

Connecting the frame and the tassels

Step 12
Thread a 50 mm eye pin through the eyes
on the right-hand side of the frame from
above. Do the same with another 50 mm
eye pin on the left-hand side.
Twist the eye pins after the outer lower row.
The top eyes of the eye pins should lie flat.

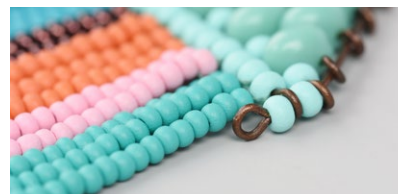

Step 13
String 1x **R8**, the eye on the pin with
the tassels and 1x **R8** onto the bent part
of the eye pins.

Create an eye on the protruding part
of the wire. Do the same on the bent part
of the other eye pin.

Step 14
Now sew the line into the outer tassels.
Twist a loop around 3 **R10** under the **R8**.
Pass the needle through it once.
Tighten. Pass the needle through 3 more
R10. Once again create a loop around
the thread from the stringing.
This time, pass the needle through it twice.
Tighten. Pass the needle through another
R10 and cut off the thread.

Step 15
Connect three rings onto the eyes at the top
of the frame. Add an earring hook
to the centre ring.

Step 16
Create the second earring. Try to make its
colors a mirror image of the first.
