Difficulty:

## Procedure:

### Step 1:

String 4x R10, 1x T, 2x R10 and thread  
the line through the T one more time.  
Repeat this another 3x. Tie it off.  
Thread the line through the T and the R10  
above it.

### Step 2:

String 1x R10, 1x T, 2x R10 and then thread  
the line through T again. String 1x R10.  
Thread the line through the 2x R10 from  
Step 1. String 1x R10. Add R10 and T to  
the next three gaps in the same way and  
then thread the line through the R10 from  
Step 1. Connect it in the R10. Thread the  
line through the T and the 2x R10 above it.

### Step 3:

Add another layer in the same way as in  
Steps 1 and 2. Continue in the same way  
until you reach the 8th layer.

### Step 4:

Do not add R10 above the T in the 9th and  
last layer. String 1xs R10, 1x T and  
1x R10 into the gaps. Sew the line in after  
connecting it.

### Step 5:

String 1x B8 and 4x B5 onto an eye pin.  
Thread it through the cavity in the middle  
of the cylinder. String 1x B8 onto an eye pin.

### Step 6:

Create an eye on the remainder of the wire  
from the eye pin. Grasp the wire between  
the points of the pliers and twist.

### Step 7:

Use a ring to attach a carabiner to one eye  
and the metal hanging part to the other  
end.
